We are learning to ensure consistency in our writing

Dad

Dear Friend,

I have thought that since you went to that care to go to where you are needed to be, mum has acted like she is the Adolf Hitler of the country. Have you seen mum drink alcohol lately before? I think you have before she never acts like this. She is running up the walls and it's like she is the boss of everyone. When you are here she is very calm and quiet but now she is very active all of a sudden. When you where around she was never like this but Now all of a sudden it just sparkings out of mum. Everything except from mum being calm is happening. It's like I am to end a goose that can lay a golden egg and I have tried to ask mum to chill out and could do it in most ways.

Mum said something about what happening and that we starting it.
