Book review of Jerry button

By Jennifer Urban and Valerio Vidali

The story of Jerry button is a boy from a small island in Terra del Fuego. Jerry button has a ~~traveller~~ wishes to explore the world beyond his island. A ship of Victorians explores visited his land. The story is full adventures exploring the world beyond his island.

The illustration grabs your imagination and the words effortlessly lead you on an adventure with this young 19th century traveler. a young adventurous boy with big dreams is dreaming to explore islands and get information about the world.

The descriptive language created a picture in my mind. In the story they use descriptive language, go on adventures and explore new places. For me the most engaging part is when Jerry goes on the ship and he feels like excitement because his dream came true and he gets to explore the world. If you feel read this book it will capture your imagination with the exotic search and makes me think of a calm island.

The islands will make you ~~want~~ want

make you go ^{to} his exotic island with exotic
the trees and sandy beaches.

Fantastic vocabulary choices. Even
better if you use fronted adverbials.
