

Shackleton's Journey

By William Bakewell

Who the book is for

The book I believe is for children from the age of eight to thirteen. The reason why I think that is because it is a historical story that has extraordinary vocabulary.

Did you find it interesting

Yes, I did find it interesting because it was about a man called Ernest Shackleton who gathered up a crew who started sailing across the whole of Antarctica. There mission was to reach Antarctica first, but after a few months their plan turns upside down. After two years they finally arrive home.

Rating

I would rate this book a four and a half because it is a book with a lot of rich vocabulary. However, it does use some words that even children in year four, five and six will not understand.

Character's

The main characters are Shackleton - Frank Horsely - and the crew. My favourite character is Shackleton because he is a determined brave character who likes to be the first to do things.
