Lin. We are having to use propositions for time place and course

Monday 6th July 2020
Hi as always & all

In the terrible year of 1516 the famous
William Shakespeare was a young
boy who went to a beautiful school at
Stratford. He was a great boy who
was great at writing plays.

Writer

He was 15 when he left school
not long after he met the woman
of his life called Ann she became
his first wife at home which
the beautiful William Shakespeare
a year later he had twins then
he decided that he would go.

He became a writer. So he came
to London although it might be risky
but it was where the money was.
For other play writers to see
I guess so they all called him
the great writer.

Did you know?

Did you know that he
died at 52 years old. Did you
know that he was still in the
tomb? Did you know that
he wrote 27 plays and 154
sonnets that he wrote his poems.

Beautiful writing Bobby!
