

Wednesday 15th January 2020.

L.O: We are learning to write for different purposes.

The Emperor penguins
live in Antarctica which
is the coldest continent on
Earth. ~~Emperor penguins~~
~~live on a small ice pack in~~
~~the Arctic.~~ Emperor
penguins eat fish, squid,
and krill. ~~Emperor penguins~~
Emperor penguins have
water proof so they
can go into the water.
Emperor penguins have
a short, thick neck,
streamlined shape,
short webbed feet, tail and
short wings. ~~Emperor penguins~~

Emperor penguins have short
wings that help them to
dive up to 900 feet to
catch larger fish.
