We are learning to use language to indicate degree of possibility in our writing

Today, I will be talking about a boy called Liam who is the main character in the book Cosmic. Liam is a 13 year old kid which is really tall and has facial hair. I will discuss if Liam should act like an adult or not.

Some people say that it is good to act like an adult, because when you are a child you want to do many things like go watch your favourite football team play in a football match and people like Liam could do that. They think people like Liam should go do what they want.

Other people say that if you act like an adult you could get rich. So for example they could offer you a job where you could get thousands of pounds. However you are going to lie about age in order to do that.

On one hand some people think that Liam should not act like an adult.
