

Monday 13th January 2020.

L.O: We are learning to write for different purposes.

In the winter when cold the penguins
they are busy and get.

The mother penguin receives and slowly give it to the
father.

The mum needs some food from all that hard work
leaving the egg.

Oh no you can't eat it.

This is a penguin egg.

So that leaves the father penguin to look after the egg.

The father penguin can eat it 4 months.
