We are learning to create & cohesion.

## Charles Darwin.

Charles Darwin was a naturalist, scientist, geologist and ~~biologist~~ <sup>biologist</sup>. He had ten children and without him we would still think that God made the world. Darwin died on the 19<sup>th</sup> April 1882 from heart failure at the age of seventy-three and was born on 12<sup>th</sup> February 1809. Charles discovered the evolution of man ~~even~~ <sup>all</sup> though, scientists in his time thought God made everything and that the world was only made 2000-3000 years ago.

Darwin's theory, which was called Darwinism, explained how man evolved from apes and monkeys. Although Darwin had no inventions, he had many discoveries, which led to us realizing God did not make the world and did not create us. This also means the world ~~was~~ was not created 2000-3000 years ago, in fact it was created one billion years ago. Charles Darwin is renowned <sup>as</sup> as an amazing thinker because he dared <sup>to go</sup> against the very lines ~~on~~ which everyone thought on.

## Mary Anning.

Anning was an English fossil collector and palaeontologist. She was born on 21<sup>st</sup> May 1799 in Lyme Regis and died on 9<sup>th</sup> May March 1847 in Lyme Regis, from breast cancer. She made a book called Jurassic coast fossils and although having discovered many pre-historic fossils, she got obtained very little attention whilst she was alive. In 1823 she discovered the ~~p~~ Plesiosaur, whilst walking on the beach with her dog Tray.

Without Mary Anning we wouldn't of known what a <sup>a</sup> full Plesiosaur until the late 1900s! In 1828, she discovered the pterodactylus and in 1810-1811 she had the discovery of a full Ichthyosaurus skeleton

Which is now being displayed in the natural history museum (London). Without Mary Anning, we would have no idea about how creatures lived millions of years ago, and how they evolved. We ~~would~~ not even know what a ~~p~~ Pterodactylus <sup>or</sup> Plesiosaur looked like and what they were.
